Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Fig. 1 discloses a gm cell 16/17, means for providing a fraction of a current 13, means for providing a fraction of a voltage 5 and controlling means ZEN as recited in claim 1. The external resistor was not given weight since it was not defined or related to in the body of the claim.

Further shown is a transistor 13 as recited in claims 7 and 8.

Further shown is a voltage reference ZEN as recited in claim 9.

Claims 15 and 21-23 are anticipated for the reasons above.

Conclusion

4. Claims 2-6, 10-14, 16-20 and 24-28 are objected to as being dependent upon a rejected base claim, but may be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
